BEAUTY DRIVEN BY TECHNOLOGY.

In the age of technology, the new Alfa Romeo Giulia has mastered the art of finding the balance of hands-on driving passion and cutting edge automated driving systems. Giulia is equipped with systems that intelligently monitor the vehicle's surroundings without ever taking away from the pleasure of driving.

ACTIVE BLIND SPOT ASSIST

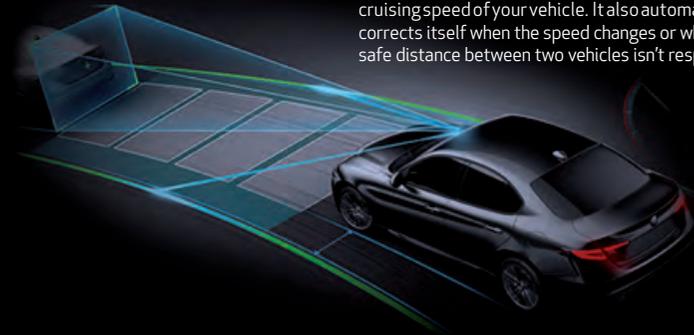

There are portions in the rear of the vehicle that are commonly known as a blind spot, which is when another vehicle is there it is temporarily invisible to the side mirrors. The Active Blind Spot Assist continuously monitors the rear blind zones on both sides of the vehicle, alerting you when you are attempting to move into a lane that is already occupied. In addition to the alert, the system also delivers a steering correction to help avoid collisions with vehicles hidden in your blind spot.

LANE KEEP ASSIST

Lane Keep Assist alerts the driver if the vehicle is straying out of its lane and provides a corrective action to help automatically correct the vehicle's path and direct it back into the lane.

ACTIVE CRUISE CONTROL

The Active Cruise Control allows you set your the cruising speed of your vehicle. It also automatically corrects itself when the speed changes or when the safe distance between two vehicles isn't respected.
